Art Unit: 1636

Claims 1-4, 6-13, 19-26, 29-35 and 37-39 are allowed.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 27 stands rejected under 35 U.S.C. 102(b) as being anticipated by Rong et al. (of record).

At the remarks filed 16 June 2011, Applicant argues that an insect produced by the recited method would possess a duplication/tandem repeat of the target sequence, e.g., TTAA for piggyBac. First of all, however, there is no limit on the target sequence, which is determined by the transposase system selected for practice of the invention. Second, even for just the piggyBac-based system, the octomer TTAATTAA would be expected to occur at random every 65,536 bases, producing over 2500 expected occurrences in the genome of Drosophila melanogaster. Thus, it would not have been possible to distinguish in such a fly whether any of these sites were the result of a recombination event as set forth in the grounds of the rejection or a natural or wild-type segment of the sequence. Natural genomic variation between individuals in a population, and more importantly, between populations, of a species of insect would make it impossible to determine if any particular individual were the result of the recited method or merely a naturally occurring variant. Thus, the insects produced by Rong et al. would not have been distinguishable from the other members of the species.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
